

# Special Feet Packs for the Repower

Tailored installation. A new life for your boat.

## Renew your vessel with ease

At Solé Advance, we make it easy: our custom engine supports are designed to simplify engine replacement, avoiding the need to modify the engine bed.

Each pack includes brackets with custom-drilled holes adapted to the dimensions of your old engine, along with the necessary bolts for a precise, hassle-free installation.

## A smart and efficient solution

Custom engine brackets allow you to install your new Solé Advance engine on the existing engine bed, reducing labour time and avoiding unnecessary costs.

- ✓ No major structural modifications
- ✓ Fast, clean installation
- ✓ Maximum compatibility and long-term reliability

# Designed to fit multiple brands and configurations

## Compatibility with most brands and models on the market

Below are examples of repowering options made possible by our custom engine feet. If your engine is not listed or uses a Saildrive, your Solé Advance distributor will help you design the most suitable solution for your vessel.
